RELEASE NOTES / History through October 2026 / SECTION 01

Release history overview

Dated product changes for the fictional TaskFlow application. Older announcements show what launched then, not necessarily the current entitlement policy.

Timeline

Release date	Version	Highlights
2024-11-06	1.0	Projects, tasks, Board and List views
2025-03-12	1.3	CSV web UI export for paid workspaces
2025-08-20	1.7	Timeline view and automated reminders
2026-01-15	2.0	Pro/Business API export and webhooks
2026-04-09	2.2	JSON export added to Pro and Business
2026-07-16	2.3	Business XLSX UI export and SSO
2026-10-01	2.4	Updated plan quotas and billing rules

How to interpret historical notes

Release Notes document when functionality was introduced. For currently available subscription features and export formats, use Plans & Billing, page 2. For permission restrictions, use Product Guide, page 2.

Version numbers correspond to TaskFlow app releases, not API version numbers. The public API remains at v1 as of October 2026.

RELEASE NOTES / History through October 2026 / SECTION 02

March 12, 2025 - CSV export

TaskFlow 1.3 shipped the first self-service project export flow. This release is intentionally cross-referenced throughout the documentation.

New: CSV export in the web application

Starting March 12, 2025, paid workspaces (Starter, Pro, and Business) could export accessible project tasks as CSV in the web UI. The Free plan was excluded. Only Owners, Admins, and Members with project access could export; Viewers were excluded.

Exports contained task IDs, titles, statuses, assignees, priorities, and due dates. Generated downloads expired after 24 hours.

What was not included

The March 2025 release did not introduce JSON, XLSX, or programmatic API export. Those features were added in later releases. A Starter customer today still has CSV export in the web UI but has never received API export entitlement.

Documentation links

Current formats and usage limits: Plans & Billing, page 2. Export workflow and user roles: Product Guide, pages 2-3. API export availability: API Guide, page 3.

Example question

“Does the Starter plan support CSV export?” Yes, in the web UI. Evidence: Product Guide, page 3 says export is paid-only; Plans & Billing, page 2 explicitly lists Starter CSV; this page establishes that paid-plan CSV export launched on March 12, 2025.

RELEASE NOTES / History through October 2026 / SECTION 03

January-April 2026 - API and JSON

TaskFlow expanded export capabilities for larger engineering and analytics workflows without changing the Starter web-UI export policy.

January 15, 2026 - Version 2.0

Introduced asynchronous API export jobs for Pro and Business. POST /v1/projects/{id}/exports accepted CSV format, with HTTP 202 job creation and 24-hour download links. Starter retained general API access but did not receive API export permission.

The same release introduced Pro/Business webhooks for task.created, task.updated, and project.archived. Deliveries use signature verification and a bounded retry schedule.

April 9, 2026 - Version 2.2

Added JSON export through the web UI and API for Pro and Business. Starter retained CSV through the web UI only. Business and Pro API exports now accept csv or json.

Practical implications

Clients requesting an API export on Starter receive 403 FEATURE_NOT_INCLUDED; this is an entitlement denial, not a temporary outage. The required paid upgrade is Pro or Business. See API Guide, page 3 and Troubleshooting, page 2.

This release did not add XLSX API support. As of October 2026, XLSX is exclusively a Business web-interface format (Plans & Billing, page 2).

RELEASE NOTES / History through October 2026 / SECTION 04

July-October 2026 - enterprise features

Recent changes improved enterprise administration and clarified plan limits and billing behavior.

July 16, 2026 - Version 2.3

Added XLSX project exports to the Business web interface. Each XLSX download contains Tasks and Summary worksheets. XLSX is not supported by the public API. Also added Business single sign-on (SSO).

October 1, 2026 - Version 2.4

Clarified flat workspace plan pricing: Free $0, Starter $12/month, Pro $39/month, Business $99/month. Updated UI export quotas to Starter 5/day, Pro 50/day, and Business 200/day. Updated API request limits to Starter 60/min, Pro 300/min, Business 1,200/min.

Confirmed first-time annual subscriptions are refund-eligible within 14 calendar days, while monthly payments and annual renewals are non-refundable except where law requires otherwise. See Plans & Billing, pages 1 and 4 for full policy.

Source-of-truth precedence

For feature introduction dates, use Release Notes. For current feature availability and pricing, use Plans & Billing. For role permissions, use Product Guide. For error handling, use API Guide and Troubleshooting.

All products, dates, endpoints, emails, policies, and prices here are fictional test data for an RAG demonstration.
